AGENDA

Friday, September 6, 2013

**Free Barbeque and Drinks
in the Composites training and
workshop areas,
12 noon closing at 4pm.**

OUTLINE OF ACTIVITIES:

PARTEC has adopted the Silicone Vacuum Bagging System by Smooth-On Inc., of USA, for inclusion into the Composites Technician trade training and in our short part-time courses.

1. PARTEC has made an arrangement with the Australian Distributors, ROWE TRADING COMPANY PTY LTD of South Australia. During the afternoon, from about 1:30pm, we will infuse several mouldings using sprayed-up silicone bags.
2. We will also demonstrate the "Silicon III" spray-up system and accessories, and make reusable custom-tailored resin infusion bags.
3. You can also meet Fred Woods from Rowe Trading, who will be in attendance.
4. Mark Halford and Dean Margetts will demonstrate the spray-up and the infusion processes.
