

Plastic & Engineering Apprenticeships >

CNC Technician Apprentice (Post Trade C7)

This course is suited for persons who need to advance towards a C7 skills classification with CNC specialisation and who hold a Certificate III in Engineering Mechanical.

Apprentices will gain high quality CNC skills training (for HET Apprentices) leading to a C7 level trade outcome, which is specialised.

Apprenticeship Program

On completion of this program, Apprentices will be able to:

- + Write NC/CNC Programs
- + Create and Manage 2D and 3D Code Files
- + Interpret Technical Manuals
- + Calibrate Measuring Equipment
- + Apply Engineering Design Concepts

“Queensland Government Subsidy” means subsidy from the Department of Education and Training.

This apprenticeship is offered at:
